Career Objective

Final-year B.Tech Computer Science (AI) student with strong foundations in Java, Python, DSA, OOP, DBMS, REST APIs, and full-stack development. Seeking an Associate Product Engineer opportunity to develop, test, deploy, and maintain reliable software while contributing to scalable web applications.

Skills

- **Programming Languages:** Java, Python, SQL
- **Core Computer Science:** Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS
- **Full Stack Development:** HTML, CSS, JavaScript, React.js, Node.js, Express.js, REST APIs, JWT, MVC Architecture
- **Databases:** MySQL, MongoDB
- **DevOps & Engineering:** Git, GitHub, Docker, CI/CD, Postman, Vercel, Render
- **Development Practices:** Agile, SDLC, API Testing

Education

Bachelor of Technology in Computer Science & Engineering (Artificial Intelligence)

CGPA: 7.84

Noida Institute of Engineering & Technology, Greater Noida

2023 – 2027

Projects

RecruitAI – AI-Powered Recruitment Management Platform | 📄 | 🌐 Live

July 2026

- Developed a full-stack Recruitment CRM using React, Node.js, Express.js, and MySQL to manage candidates, job postings, applications, interviews, and recruitment workflows.
- Built and integrated 10+ RESTful APIs with JWT Authentication and Role-Based Access Control (RBAC) for secure recruiter and administrator workflows.
- Tested REST APIs using Postman and validated authentication, authorization, request handling, and API responses across core application workflows.
- Designed a normalized MySQL database with 8+ tables and implemented backend logic for candidates, jobs, applications, interviews, recruiters, and workflows.
- Deployed the frontend on Vercel and backend on Render, handling application configuration and production deployment for an end-to-end full-stack system.

Rentify – Smart Rental Management System | 📄 | 🌐 Live

May 2026

- Engineered a full-stack rental management system using Node.js, Express.js, MongoDB, and EJS to manage properties, tenants, billing, payments, and rental workflows.
- Implemented **MVC architecture** to separate models, views, controllers, and routes, improving code organization and maintainability.
- Developed 5+ RESTful APIs with JWT-based authentication to secure property owner and tenant operations.
- Automated monthly rent, electricity, and utility bill generation using dynamic pricing, invoice-processing logic, and payment-status tracking.
- Built responsive dashboards to monitor occupancy, revenue, payment status, and property performance across rental operations.

Achievements

- Selected among **3,000 participants** nationwide for **Amazon ML Summer School 2026** through a competitive selection process.
- Solved **300+** Data Structures & Algorithms problems across LeetCode, HackerRank, and GeeksforGeeks.
- Achieved a peak LeetCode Contest Rating of **1495** while maintaining a **200+ day** coding streak, demonstrating strong problem-solving skills and consistency.
- Earned the **Python Gold Badge** on HackerRank with **435+** points.

Extracurricular & Hackathons

Amazon ML Summer School (MLSS) 2026 – Selected Participant

July 2026

Machine Learning Program

- Gained a strong foundation in Supervised Learning, Deep Learning, Reinforcement Learning, Generative AI and Large Language Models (LLMs) through advanced coursework.

Hackurate – Zenovia 2025, Bennett University

Feb 2025

AI Hackathon Participant

- Developed an AI-powered sketch recognition application using TensorFlow.js, HTML, CSS, and JavaScript.
- Collaborated in a team to integrate AI models into a responsive web application during the hackathon.

Certifications

- Java Fundamentals by Oracle Academy
- Python Essentials by Cisco Networking Academy
- Fundamentals of Large Language Models (LLMs) by Hugging Face
- Artificial Intelligence Primer by Infosys Springboard
